The programs setup, commitments & requirements

Gérald Hussenot Bluefish France

A vital industry

1

On-board scientific observers and transmit data to scientists

2

Develop and use selective fishing equipment to preserve sh stocks

3

Certify efficient environmental initiatives

4

Preserve threatened species

5

Implant artificial reefs to protect the quality of natural habitats

A vital industry

Recycle nets and collect sea macro-waste

Reduce energy consumption of fishing vessels

Improve fishermen safety conditions, including in aquaculture

Improve fishermen socioeconomic conditions

Develop fishing tourism

Standard de Développement Durable de l' Anguille

Blue Fish finance le coût de certification et la mise aux normes des 65 bateaux du barrage d'Arzal (achat de tamis - simplement).

Pour obtenir la certification SEG, il faut répondre à 7 critères :

1- Objectif de gestion

- 40 % d'échappement (repeuplement)

2- Gestion de la pêcherie

- Obligation d'utilisation d'un même tamis

3-Réduction de la mortalité inférieure à 4 %

4-Pêche accessoires

-la pêche doit être inférieure à 1 % du poids et remise à l'eau vivante

5-Pêche sur d'autres espèces sensibles

- La pêche ne doit pas avoir d'impact significatif sur les autres espèces (poissons migrateurs).

6-Impact sur l'habitat

- la pêche ne doit pas avoir d'impact significatif sur l'habitat (les fonds ou les rives)

7-Recherche -Enseignement

- la pêche contribue à la recherche ou la mise en œuvre d'un plan de gestion.
